

A Trusted Resource
for Environmental Legal Counsel

ENVIRONMENTAL

MEETING INDUSTRY'S GLOBAL ENVIRONMENTAL CHALLENGES

In a global economy impacted by a wide variety of environmental rules, businesses in the 21st century are ever more vigilant about environmental compliance and corporate responsibility. The challenges for industry continue to grow as environmental requirements have become so complex that companies, regulators and courts frequently do not fully understand or accurately interpret them.

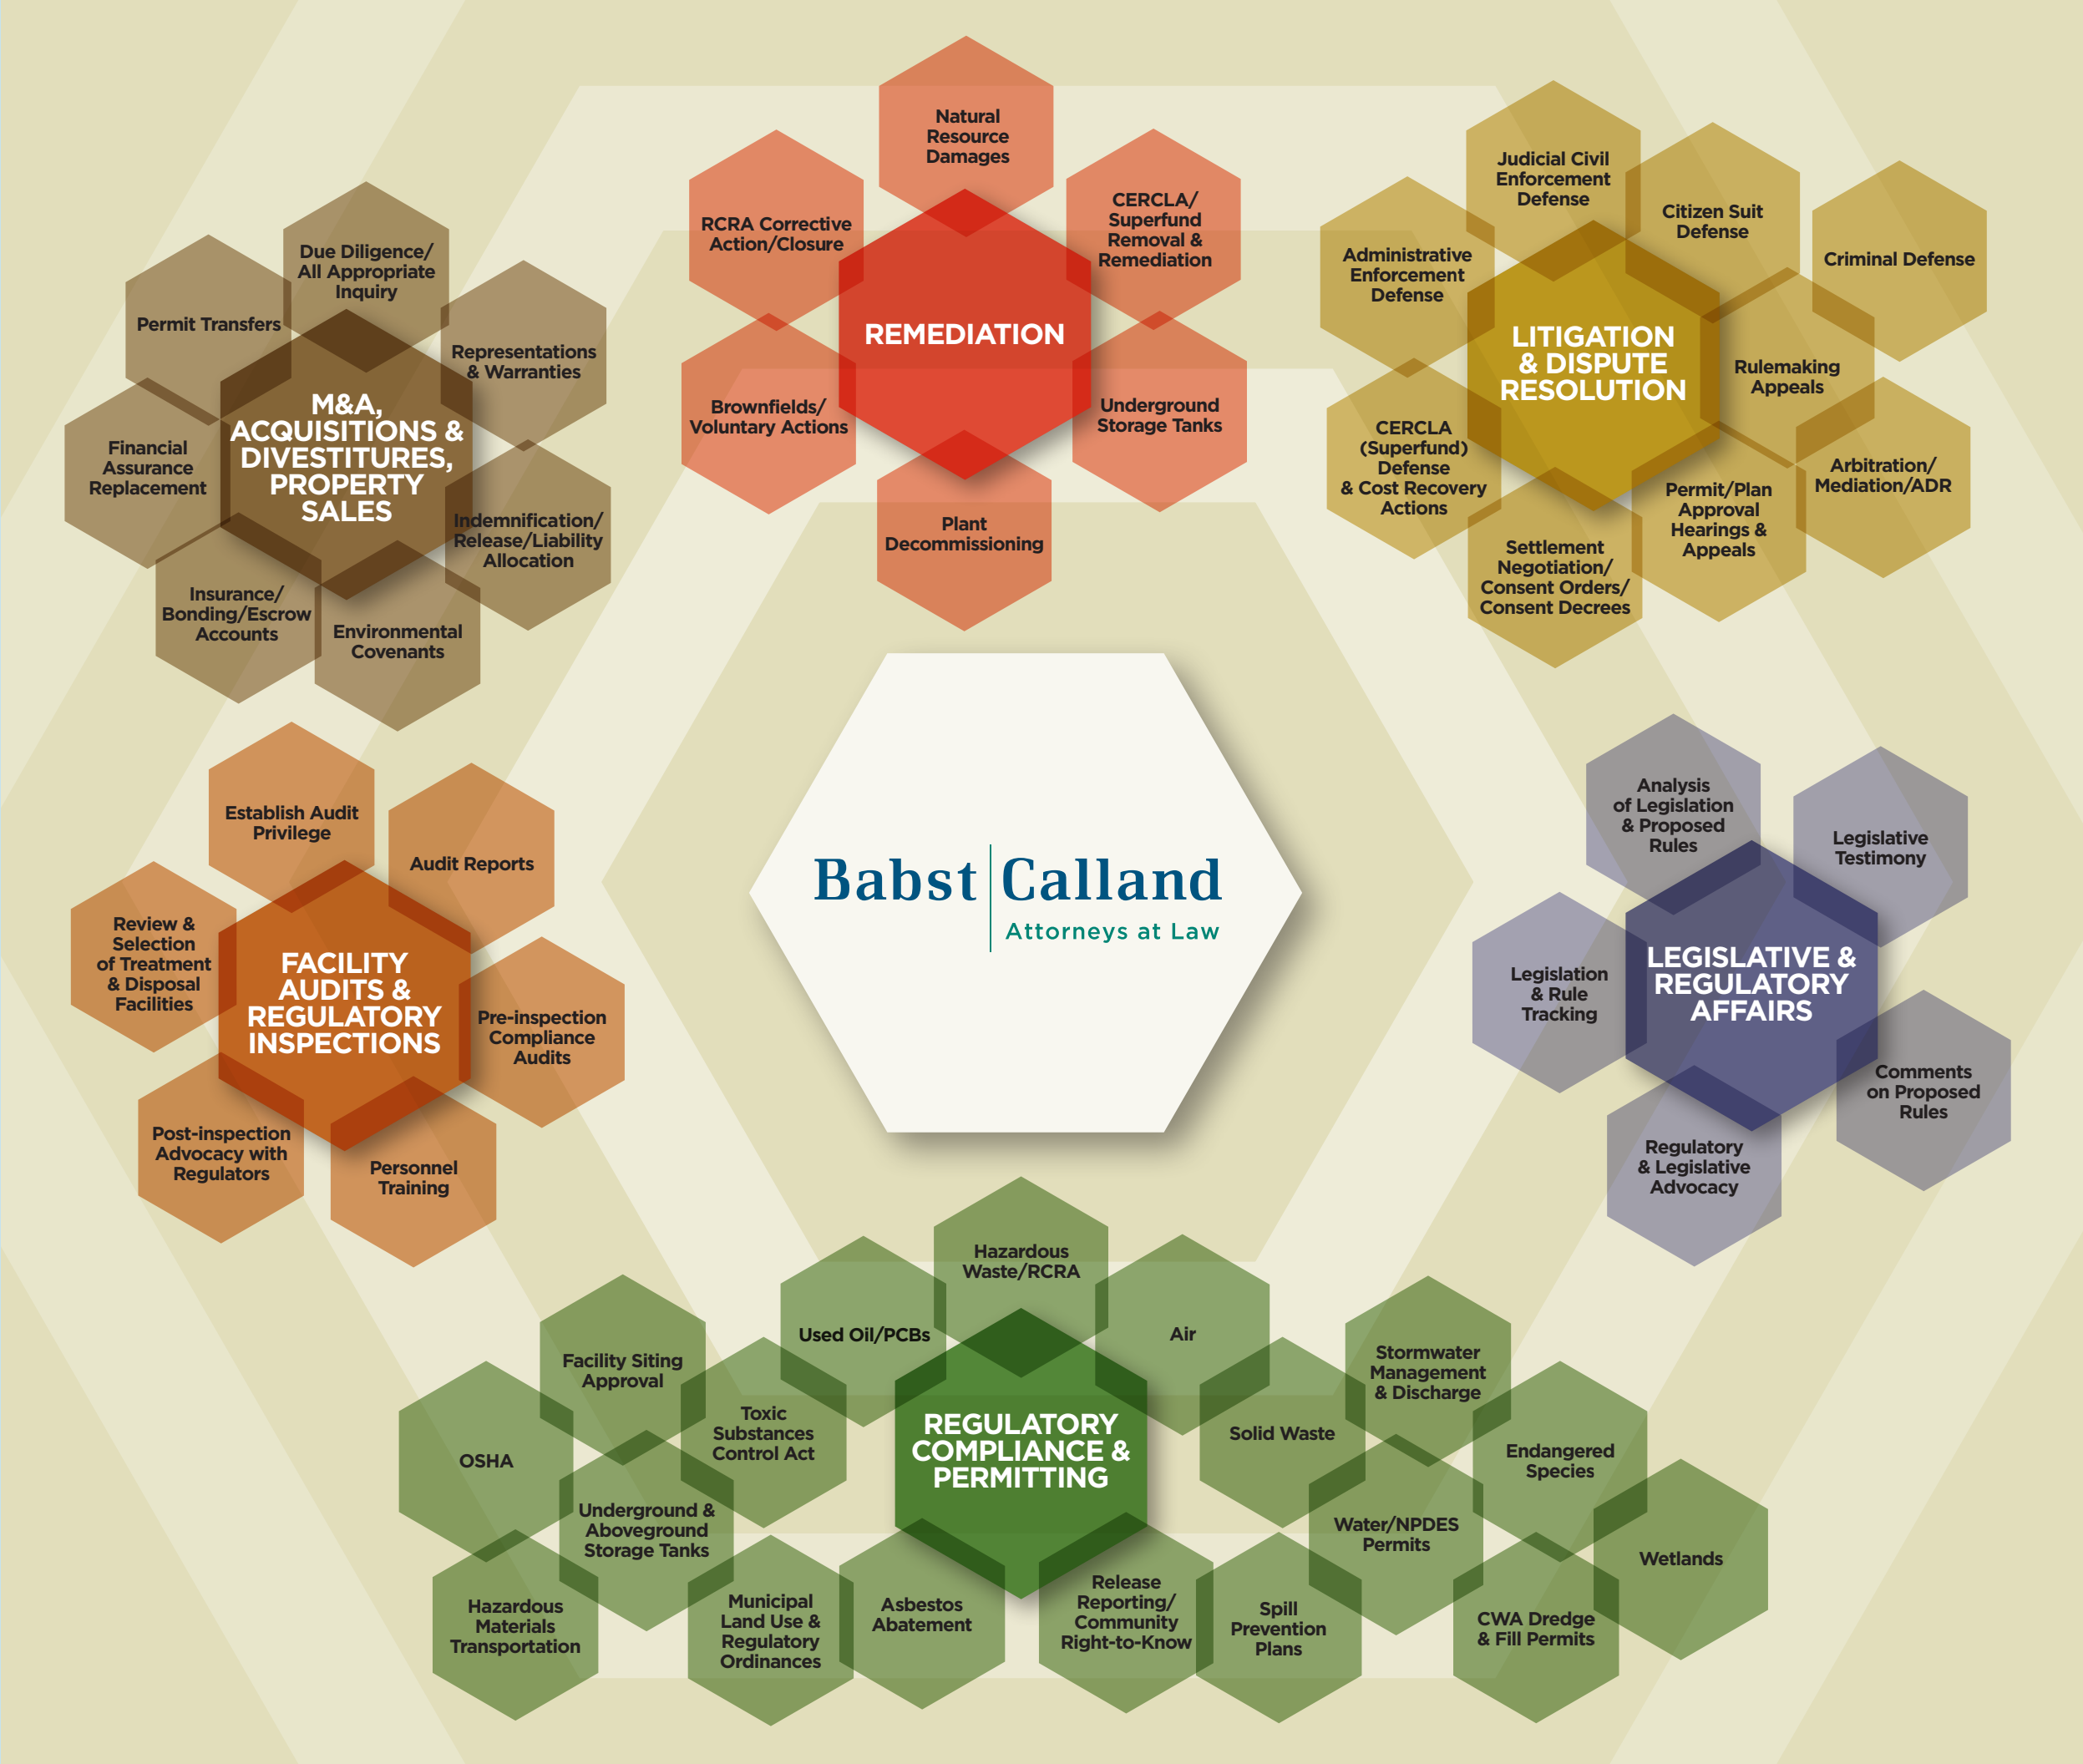

We serve clients, both domestically and abroad, in many industries and business sectors including chemical, natural gas, coal, oil, power generation, steel, heavy and light manufacturing, public authorities and municipalities, research and development, transportation, waste disposal, commercial development, and banking and finance.

We make it our business to understand a client's operational processes and facilities to provide practical, strategic solutions that work. As experienced environmental counsel, Babst Calland attorneys quickly determine what is required, and how to manage legal proceedings and regulatory compliance in the most effective manner and at the lowest cost. In fact, our team of attorneys is 100 percent-focused on environmental matters.

Each attorney practices in specific areas of concentration, such as air and water pollution, industrial and municipal wastewater management, hazardous and solid waste disposal, complex site remediation, natural resource damages, chemical regulation and occupational safety and health.

There is no learning curve with Babst Calland. Our environmental attorneys are adept at mobilizing an effective and efficient resolution process on a variety of local, national and global environmental matters.

RESPECTED ENVIRONMENTAL COUNSELORS

With a history of hands-on experience and a reputation for serving a broad array of clients, Babst Calland is one of the most respected environmental law firms in the nation. Babst Calland's service is unsurpassed when it comes to addressing new or legacy problems, or warding off impending complications that may be on the horizon.

Our environmental regulatory attorneys have strong technical backgrounds and years of in-plant experience that helps them to provide practical solutions to the most complex environmental problems. Many of our attorneys have spent time in the field as environmental professionals and have degrees in environmental, electrical and chemical engineering, environmental sciences, biophysics, biology and microbiology, industrial hygiene, as well as oceanography, limnology, ecology and forensic chemistry.

Our clients have relied on us for more than three decades as trusted environmental counselors. Our integrated, multidisciplinary approach and preventative law philosophy enables us to collaborate with our attorneys in other legal practice disciplines, such as corporate and commercial, employment and labor, construction, energy and natural resources, land use, litigation and transportation safety.

Through this collaborative approach, Babst Calland is focused on resolving legal and transactional matters, while averting further exposure and risk for clients. This helps to reduce time and expense in making sure both direct and indirect impacts are minimized.
