

A dedicated legal partner to the energy industry for over 35 years.

Our team counsels clients throughout the project life cycle. From strategic planning to development to commercial operation and beyond, we provide essential guidance in ever-changing markets and regulatory environments.

Transactions & Consulting

Purchase and sale, financing, due diligence, PPAs, equipment supply, offtake, fulfilling ESG requirements.

Project Planning & Site Acquisition

Real estate, site control through lease/option, title examination and insurance, land use and zoning, regulatory compliance, entity structures.

Approvals & Permitting

Site permitting and approvals, stakeholder engagement, transmission infrastructure.

Babst Calland's Renewables Group

understands the opportunities and challenges of the ever-changing patchwork of federal, state, and local regulations and incentives for renewables.

Environmental

Endangered/protected species, habitat conservation and mitigation, environmental site assessment, Brownfields redevelopment.

Construction, Operations & Maintenance

EPC and O&M agreements, equipment supply warranties, insurance, facility and transportation safety requirements.

Renewables Technologies

Solar, wind, hydrogen pipelines and infrastructure, carbon capture, utilization and sequestration, battery storage, emerging energy technologies.
